

March 25th 2021

To All Students,

Toshihiro Yasuda
Vice President for Education

COVID-19 Measures

Although the state of emergency was lifted in all prefectures on March 21st, the infection risk might increase because many people move across Japan or gather for having meals at the beginning of a new academic year.

In order to manage both securing students' learning opportunities and preventing the spread of COVID-19 for the students' college life without any anxiety, we would like to inform you of cautions in campus life at the University of Fukui as below. We would also like to ask you to take infection prevention measures thoroughly.

1. Precautions before classes start

- (1) Settle down in a new place with plenty of time in advance, take your temperature every day, and make every effort to stay healthy.
- (2) Refrain from taking actions which increase the infection risk for 2 weeks before you enter Fukui prefecture and going out unless absolutely necessary to manage your health condition.

2. Daily Precautions

- (1) Take infection control measures thoroughly, such as by maintaining space between people by keeping 2 meters apart (or 1 meter at the very least) and by wearing a mask (coughing etiquette) and hand washing on a regular basis.
- (2) Take action keeping "new normal" in mind for preventing situations in which the three following conditions overlap:
 - ① Closed spaces with bad ventilation
 - ② Crowded places with many people nearby
 - ③ Close-contact settings such as close-range conversations

3. Precautions in Campus Life

- (1) Classes start on April 12th (Mon.). Wearing a mask is required on campus.
- (2) Take your temperature every day, record it in the "Health Checklist" to check your health condition. Keep the health checklist by yourself and submit it on the university's requests.

If you have any symptoms such as a fever, do not go to the university and consult with your family doctor or the nearest medical institution first.

- (3) When having meals, avoid the 3Cs, practice good hand hygiene, and refrain from talking. Try to use the co-op cafeteria and shops at a different time to avoid congestion.
- (4) Do extracurricular activities following “Student Action Guidelines for Preventing COVID-19 Infection” and “Guidelines for the Phased Deregulation of Extracurricular Activities for Students at the University of Fukui” (Attachment 2).
- (5) Student Dormitory, The Overseas Student House and Makishima House are places where students live in groups. Since there are many common facilities and many people live in groups all the time, take the same infection prevention measures on campus above thoroughly.
- (6) Make every effort to take infection prevention measures outside the university as well. Do not go in and out of places with a high infection risk because of crowds of people. Also, do not have parties where many people eat and drink together.
- (7) When you need a scholarship or any other support to pay the tuition fees or any other payment because your financial condition changes, contact the university.
- (8) Please have a closer look at the documents below;
 - ① [Student Action Guidelines for Preventing COVID-19 Infection](#)
 - ② [Class Policy for Preventing the Spread of COVID-19 Infection](#)
 - ③ [Class Policy for the Academic Year 2021](#)
 - ④ [Orientations for Freshmen Year](#)

4. Others

Information regarding course registration or class policies will be announced on the university website, student portal, or guidance by each school or graduate school. Please be sure to check them.
